

## **SAVE Supervision Information and Participation Requirements**

The Adult Probation and Parole Department has evaluated you and found that you should be referred for Swift Alternative Violation enforcement (SAVE) supervision to resolve you pending VOP(S).

SAVE supervision is a sentencing option for the Court. It may be imposed either after admission of the allegations in the VOP Petition or after a hearing.

Because you have been recommended for SAVE supervision you will have the following benefits:

- A greatly expedited Level II hearing.
- Release from custody more promptly than in the normal course of violation hearings.
- Avoidance of the imposition of an incarceration sentence that would ordinarily be recommended. Your violation guideline range is \_\_\_\_\_

SAVE is a form of supervision with set sanctions as explained in the Sanction Notice you have received. While under SAVE supervision, depending on your conduct, you will serve substantially less incarceration time for violations of your probation or parole. However, to accomplish this, violations will be addressed more swiftly than in the usual procedure. Each violation while under SAVE supervision will be counted as a Level I violation detention hearing. Your level II hearing will be held in abeyance while you continue on SAVE supervision. If, at any time, your SAVE supervision is unsuccessfully terminated you will receive a Level II hearing. Your previous Level I SAVE violations will form the basis for Adult Probation and Parole's violation petition and will be considered at your Level II hearing.

To provide you the benefits of an expedited Level II hearing and release from custody, avoidance of the recommended sentence and shorter periods of incarceration for violations while under supervision, you must be willing to waive certain rights and procedures as set out in the SAVE Participation Requirements.
