A twelve-digit code uniquely identifies each of the six levels of classification within six two-digit fields. The first two-digits identify the water-resources region; the first four digits identify the sub-region; the first six digits identify the accounting unit; the first eight digits identify the cataloging unit; the first ten digits identify the watershed unit; and the full twelve-digit code identifies the subwatershed. An example is given here using hydrologic unit code (HUC) 020402031003:

02 - The Mid-Atlantic region (HUC-2)
0204 - The Delaware sub-region (HUC-4)
020402 - The Delaware accounting unit (HUC-6)
02040203 - The Schuylkill cataloging unit (HUC-8)
0204020310 - The Lower Schuylkill watershed unit (HUC-10)
020402031003 - The Pickering Creek subwatershed unit (HUC-12)
