

5 Actions to Protect Employees From the Harmful Effects of Tobacco

REDUCE TOBACCO USE • INCREASE HEALTH & PRODUCTIVITY

THE HEALTH PROBLEM

Smoking hurts the U.S. economy, costing more than **\$300 billion annually** in direct medical care and lost productivity.

An employee who smokes costs an employer an additional **\$6,000 per year** over a nonsmoker because smokers miss work or need more time to recover and respond to health treatments.

\$6,000

Employees of U.S. companies who live in developing countries are at **increased risk from death and illness** from tobacco use and second hand smoke exposure.

Cigarette smoking is the single-largest cause of preventable disease and death in the United States, killing **more than 480,000** Americans each year.

SMOKING CAUSES

LUNG CANCER DEATHS

CANCER DEATHS

HEART DISEASE DEATHS

CHRONIC OBSTRUCTIVE PULMONARY DISEASE CASES

THE GOOD NEWS...

Among adult smokers, **70% report** that they want to quit completely, and more than **40% try to quit** for at least 24 hours each year.

THE SECONDHAND SMOKE PROBLEM

Adult employees that don't smoke but are exposed to nearly **70 cancer-causing chemicals** and there is no risk-free level of exposure.

Secondhand smoke results in **\$5.6 billion in lost productivity** each year because **1 in 5 U.S.** workers are exposed to secondhand smoke at the workplace.

Every year, **41,000 U.S. nonsmokers** have died from second hand smoke exposure.

SECONDHAND SMOKE CAN CAUSE...

HEART DISEASE

STROKE

LUNG CANCER

THE WORK ENVIRONMENT PROBLEM

1,000 square feet smoke-free facility

1,000 square feet smoking allowed

When smoking is permitted at a worksite, about **\$728 more per 1,000 square feet annually** is needed for maintenance costs than for smoke-free worksites

With commercial buildings averaging **12,000–19,000 square feet**, that's an extra **\$8,736 to \$13,832 per year**.

19,000 SQUARE FEET = **\$13,832** COSTS EACH YEAR

12,000 SQUARE FEET = **\$8,736** COSTS EACH YEAR

LEARN MORE AT: http://www.cdcfoundation.org/businesspulse?utm_source=welcoa-tobacco-ig

SMOKING AT THE WORKSITE...

Increases health and building **insurance costs** by up to **30 percent**.

Increases costs for **cleaning and renovating** buildings.

Lowers the resale value of corporate property such as fleet vehicles.

AND CIGARETTES ARE JUST PART OF THE PROBLEM...

Tobacco products come in a variety of forms, with cigarettes being used by almost **40 million adults in the U.S.**

An additional **9 million adults** use electronic cigarettes, smokeless tobacco and cigars.

More than **three in four users** of e-cigarettes also smoke regular cigarettes.

Nicotine in any form can harm brain development.

All tobacco products are harmful to health.

Cancers of the mouth, esophagus and pancreas are associated with chewing tobacco.

Nicotine, heavy metals, ultrafine particulate and other harmful ingredients to health are emitted in the aerosol/water vapor from e-cigarettes.

AND WHAT TO DO ABOUT IT...

5 ACTIONS YOU CAN TAKE TO PROTECT EMPLOYEES

FROM THE HARMFUL EFFECTS OF TOBACCO

- 1 Adopt a comprehensive tobacco-free worksite policy. Prohibit use of all tobacco products on workplace property, including outdoors, in parking areas, and in company vehicles, by everyone at all times.
- 2 Offer all employees and their dependents health insurance that covers quitting through approved medications and counseling with little or no co-payments.
- 3 Promote the free national quitline, 1-800-QUIT-NOW, and smokefree.gov.
- 4 Promote CDC's Tips From Former Smokers™ campaign website, for inspiration and help in quitting.
- 5 Consider locating your business in jurisdictions with comprehensive smokefree policies.

Learn how CDC can help business leaders protect employees' health by reducing tobacco use and secondhand smoke exposure in the new CDC Foundation Business Pulse:
