

## Residential Placement

Residential placement in the Intellectual Disability program is defined as licensed or unlicensed residential or life sharing arrangements. Residential placements are intended to provide services to meet the needs of individuals to live in the community with staff support.

- Funding is provided through the Consolidated Waiver. Enrollment is based on urgency of need and availability of waiver slots.
- Individuals pay room and board and other personal expenses, using their Social Security benefits and/or salary. A Room and Board or Rent Contract is developed and signed.
- Once waiver funding is secured, families are notified. Individuals and families collaborate with Supports Coordinators to identify appropriate programs and providers.
