

2019 Chester County Water Plans Updates Municipal and Stakeholder Input Questionnaire

The Chester County Water Resources Authority is preparing to update “Watersheds” (the County’s Integrated Water Resources Plan), the “County-Wide Act 167 Stormwater Management Plan”, and the “County-wide Act 167 Model Ordinance” to ensure that they continue to meet the County’s evolving water resources needs. A key component of that process is getting feedback on desired changes from municipalities and stakeholders across the County. Please consider the following questions, and feel free to provide us with any additional thoughts, suggestions, comments, or ideas.

Municipalities/Organizations You Represent: _____

Your Name and Contact Information (Optional): _____

1. What are your two most prominent water resources concerns?
2. What goal(s) should be achieved over the next 10 years to address the concerns listed above?
3. What other topic(s) should be included in the updated county water plans?
4. What provisions within the Act 167 Model Ordinance have presented the greatest implementation challenges?
5. What updates or revisions are needed to alleviate these challenges?
6. What positive changes in stormwater runoff have you noticed since adopting the ordinance?
